CAREER OBJECTIVE

Motivated Software Development Engineer with a strong foundation in Data Structures & Algorithms and practical experience building web applications using the MERN stack. Skilled in developing responsive user interfaces, implementing RESTful APIs, and managing application state in JavaScript frameworks. Eager to solve real-world technical challenges and contribute to scalable, user-focused software systems.

SKILLS

Programming Languages: JavaScript (ES6+), C++, C, Data Structures & Algorithms
Frontend Development: React.js, Redux, HTML5, CSS3, Tailwind CSS, Bootstrap
Backend Development: Node.js, Express.js, RESTful APIs, Role-Based Access Control (RBAC)
Databases & Tools: MongoDB, MySQL, Git, GitHub, VS Code, Postman

INTERNSHIPS

Autovyn Consultancy Pvt. Ltd. — Frontend Developer Intern Jun 2025 – Sep 2025

- Developed **10+ reusable UI components** for a production-scale application (True Value – Maruti Suzuki), maintaining consistent design patterns across the platform.
- Refactored component structure and styling organization to support long-term scalable frontend development.

SKIT Jaipur — Frontend Developer Intern Jul 2024

- Designed responsive web pages using modern CSS and JavaScript following a **mobile-first approach** with consistent cross-browser styling.
- Conducted cross-device testing and optimized layout behavior to ensure seamless user experience across different screen resolutions.

PROJECTS

Full Stack Job Portal (MERN) Jan 2026

- Built a job portal with complete workflows for **recruiters and job seekers** using MongoDB, Express.js, React, Node.js, and CRUD operations.
- Integrated **Role-Based Access Control (RBAC)** to enforce strict separation between recruiter and candidate routes and dashboards.

Myntra UI Clone Aug 2025

- Developed a pixel-accurate responsive e-commerce interface inspired by Myntra using **React, HTML, CSS, and JavaScript** with reusable components.
- Implemented **dynamic product filtering, category browsing**, and a centralized shopping cart powered by **Redux** for global state management.

Frontend Mini React Apps

- Built interactive frontend applications including a **Weather App** using REST APIs for real-time data, a **To-Do List** with CRUD operations and local storage persistence, and a **Tic Tac Toe** game with win-detection logic and turn-based gameplay using JavaScript.

EDUCATION

B.Tech in Information Technology 2023 – Present
Swami Keshwanand Institute of Technology (SKIT), Jaipur **CGPA: 8.62**

Senior Secondary (CBSE) 2022 – Percentage: 88.6%

Secondary (CBSE) 2020 – Percentage: 86.6%

ACHIEVEMENTS

- Secured **2nd Position in Technothon 2K26** for designing an innovative waste management and route optimization solution at the institute level.
- Solved **300+ DSA problems** on LeetCode and GeeksforGeeks with a strong focus on arrays, strings, linked lists, trees, and dynamic programming.
- Organized and managed **technical hackathons and coding competitions** at SKIT Jaipur, coordinating cross-department participation.
